UnitySteps

Every Step Counts.

Your walkathon companion – track laps, unite teams.

✓ Lower cost than RFID ✓ No manual counting ✓ Free for participants ✓ Live leaderboards & milestones

1. Organizer downloads the App & performs setup ahead of event. Runs free trial, building confidence it works in their environment.
2. Organizer decides to proceed, converting free trial to paid event (unlimited participants). Refines setup & sets up teams list.
3. Participants download App **for free**, either ahead of time or on event day. Printed QR codes make this easy!
4. Participant joins event via code or QR, then selects team.
5. Once the event starts, UnitySteps records a lap every time a participant's phone crosses finish line.
6. App automatically tallies team laps, event laps and leaderboards **in real time**. Can be shown on big screen(s).
7. Post-event organizer can download all data as desired.

How does it work?

Uses phone GPS to determine when the finish line has been crossed. Cycles through different tracking modes to save battery.

Is it 100% free for participants?

Yes!

Do all participants need their own phone?

Yes, although laps can be manually added through the organizer's account. Family profiles allow tracking under child's name using parent's account.

What are the benefits?

Increased engagement by seeing the total laps increase, across the team and entire event, in real time, with fun milestones to hit!

What other features exist?

Message all participants, leaderboards, sharable social media stats cards, achievement milestones + more!
